IMPERVIOUS

In Zimbabwe, reading the news costs 5 cents an article. If you’re poor, you stay uninformed. And if you send a photo to a news tip-line, your GPS is still inside it. You can get caught.

impervious++

IMPERVIOUS

IMPERVIOUS fixes both. It strips a news site from 4MB to 38KB which is 100x cheaper. And it deletes GPS and device ID from photos **BEFORE** it saves them, so sources are safe. It contains:

* Zero third-party libraries
* Pure C++
* Works offline on any old computer.

imperviousㅋㅋ

IMPERVIOUS

PROBLEM:
Two crises killing media in Zimbabwe.

1. DATA COSTS
5GB Monthly data costs over $9. News site = 4MB. 1 article = 5 cents.
Poor Zimbabweans cannot afford to stay informed.

2. SAFETY
A photo sent to a news tip-line still has GPS, phone model and time information.
One mistake = source exposed.

impervious++

IMPERVIOUS

SOLUTION: IMPERVIOUS

01 – HTML DATA-STRIPPER
Turns any web page into a 30KB .imp file.
No trackers. No ads. No heavy scripts. 94% smaller.

02 – METADATA SANITIZER
Kills EXIF, GPS, device ID BEFORE a file touches disk.
Byte-layer protection for whistleblowers.

impervious++

IMPERVIOUS

DEMO: Data Stripper
Before → After

BEFORE: herald.co.zw (4.2MB)
- 27 trackers, 12s load on TelOne, 5c per article.

AFTER: herald.co.zw.imp (38KB)
- 0 trackers, <1s load, 0.05c per article.

Result: 100x cheaper to read news.

imperviousㅗㅗ

IMPERVIOUS

DEMO 2: SANITIZER
How IMPERVIOUS protects sources.

Normal Scenario: Phone Photo → GPS (-17.82, 31.03) → Saved → Source at risk.

WITH IMPERVIOUS:
Photo → Checks bytes in RAM → DESTROYS GPS/EXIF → Clean file saved

No trace left. EVER.

imperviousCC

IMPERVIOUS

WHY C++? WHY ZERO-DEPENDENCY?

*** No libs = Works on an old NewsDay PC**
*** No internet = Works offline in a rural bureau**
*** Linear parsing = Faster than a normal browser**
*** Byte-level = Can’t be bypassed like JS cleaners.**

imperviousㅋㅋ

IMPERVIOUS

WHO NEEDS THIS?

1. MEDIA HOUSES (Herald, NewsDay, 263Chat)
*** Possibility to offer "Lite Mode" for readers.**

2. ZMC / MISA / NGOs
*** Secure tip-lines**

3. EVERY ZIMBABWEAN
*** Reads news for 2 cents.**

Revenue: $100/mo Lite API + $500 secure drop.

imperviousAI

IMPERVIOUS

IMPERVIOUS IS NOT AN APP.
IMPERVIOUS IS INFRASTRUCTURE.

In Zimbabwe:
Information **should** not cost a loaf of bread.
And telling the truth should not cost your life.

IMPERVIOUS makes both possible.
Built from first principles. For Zimbabwe.
